

Hyperparameter fine tuning for medical image classifier that uses prototypcial FSL model

Sarvam Jha

Created on April 26, 2026 | Updated on April 26, 2026

I fine-tuned two hyperparameters learning rate(lr) and K (number of shots)

I tested learning rate(lr) for values [0.001,0.0001]

I tested K for value of [1,5]

Number of episodes=300

Overall test cases =4:-

[K=1,lr=0.0001]

[K=1,lr=0.001]

[K=5,lr=0.0001]

[K=5,lr=0.001]

Created with  on Weights & Biases.
